## **Table of Contents**

VIEW/SLEW MODULE	
Camera View	
Back to Cockpit	
Same Level Moving	
Rotation	
Zoom	
Reset and External Views	

### **VIEW/SLEW MODULE**

Control the current camera view and zoom as well as use the aircraft slew mode to move your aircraft exactly to the position you need it.

### **Camera View**

### image

The left section in the screen controls the current camera view.

#### **Back to Cockpit**

### image

First there is an easy way to go back to your cockpit: You can either go back to the virtual cockpit (3D) or the 2D cockpit.

#### Same Level Moving

### image

With the left two buttons you can move the view forward or backward.

The other buttons can be used to move the view to all directions.

#### Rotation

### image

Use these buttons rotate the view left and right or up and down.

#### Zoom

### image

Here you can zoom the view in and out by using two different speed levels.

### **Reset and External Views**

### image

Additionally you can reset the current view to its defaults or iterate through all external views defined by the currently loaded aircraft.
